Re: 10/5 Pool Vacation Slide

Dear Brothers and Sisters:

Some of you may encounter problems sliding your vacation in the 10/5 pool as per option 27 in TSS.

If you are in the 10/5 Pool and cannot slide your vacation please call crew support and have them slide it for you.

The reason for the problem is that TSS is not programmed to recognize the extra day off/extra working day schedule. TSS is programmed for true 10/5 overlay cycles. On months where there is an extra day off or working day associated with a given pool your vacation slide will not work automatically in TSS.

Fraternally yours,

Bruce Carlson
Local Chair BLET Division 290
